EXPERIENCE

Fullstack Engineer

Frontend Simplified

02/2024 – 07/2026

- Delivered **CI/CD**, **DevSecOps**, and load-testing workshops using **GitHub**, **Git**, **Jira**, and **Linear**, enabling **85%** of participants to adopt automated deployment workflows within **3 months**.
- Built and deployed a reusable component library with **TypeScript**, **ShadCN/UI**, **TailwindCSS**, **pnpm**, and **Turbopack**, reducing development time by **40%**.
- Led **performance optimization** sessions using **Lighthouse**, **WebPageTest**, **code splitting**, and **tree shaking**, improving application load times by **50%**.
- Taught **RESTful API** integration and **CI/CD** pipeline concepts using **GitHub Actions** in project-based workshops, enabling participants to successfully deploy full-stack applications end-to-end.
- Mentored 20+ developers through structured **React** and **Next.js** code reviews and Test-Driven Development practices, earning top-5% mentor rankings within 6 months.

Frontend Engineer

Skinstric AI

11/2024 – 04/2025

- Built a real-time analysis platform using **Next.js 14**, **React**, and **TypeScript**, integrating **OpenAI Vision API** and **LLM APIs** to achieve **98% accuracy** and increased user retention.
- Integrated frontend features with **GraphQL** and **REST APIs** backed by **MongoDB**, **SQL**, and **Prisma**, supporting consistent data synchronization across multiple application services.
- Developed and maintained **Node.js** and **Express.js** services to support core application logic and third-party integrations, enabling scalable feature expansion.
- Implemented scalable state management with **Zustand**, **Redux Toolkit**, and **React Query**, reducing re-renders and cutting UI latency by **300ms**.
- Improved accessibility using **WCAG 2.1**, **ARIA**, and **Axe-core**, achieving a **98% Lighthouse** accessibility score.
- Deployed and managed cloud-hosted applications using **Firebase** and **Vercel**, integrating **Stripe APIs** to support secure payment workflows.

Frontend Engineer

NFTverse

01/2023 – 01/2024

- Improved mobile UX using **React**, **React Hook Form**, **TailwindCSS**, and **JavaScript**, increasing user satisfaction by **35%**.

- Implemented dynamic search and filtering features consuming **REST APIs** and **MongoDB** data, reducing interaction latency by **30%**.
- Collaborated with designers using **Figma** and engineers using **GitHub** and **Agile** workflows, accelerating feature delivery by **20%**.
- Increased application reliability by writing **Jest** and **React** Testing Library tests, reducing regressions across core user flows during feature releases.
- Supported deployment pipelines through **version control**, **debugging**, and **continuous improvement** practices, contributing to smoother releases and faster issue resolution.

FEATURED PROJECTS

FormGuard - Bot Detection & Lead Quality Platform

Role: npm Package + Full-Stack WebApp + Dashboard (Solo Project) | Technologies: Next.js 16, TypeScript, TailwindCSS v4, React 19, shadcn/ui, Recharts, MERN Stack (Backend API)
URL: <https://formguard-mu.vercel.app/>

- A comprehensive SaaS platform that automatically detects bots, scores lead quality (0-100), and tracks form drop-offs. Features include VPN/proxy detection, disposable email filtering, real-time submission actions (block/flag/allow), and detailed analytics dashboard.

El Hage Jewelers E-commerce Website

Role: Full-Stack WebApp + Dashboard (Solo Project) | Technologies: MERN Stack, Next.js v15, TailwindCSS, TypeScript, Redux URL: <https://el-hage-jewelers.vercel.app/>

- Complete e-commerce solution for a jewelry store, built entirely from scratch as a full-stack application

Masdar Online

Role: Team Developer | Technologies: Next.js, Bootstrap, JavaScript, Redux
URL: <https://www.masdaronline.com>

- Collaborative project showcasing modern web development practices with responsive design and user-friendly interface

WebForge Academy

Role: Lead Front-End Developer | Technologies: Next.js, TailwindCSS, TypeScript, Node.js, GSAP, Redux
URL: <https://webforgeacademy.tech>

- initiative to create an online coding BootCamp focused on full-stack web development. I designed and developed the entire platform, including the enrollment system, curriculum sections, and responsive front-end, with a strong emphasis on UX and performance.

SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, Rust

Frontend: React, Next.js, HTML, CSS, TailwindCSS, ShadCN/UI, Material UI

Backend: Node.js, Express.js, REST APIs, GraphQL

Databases: MongoDB, PostgreSQL, Prisma

State & Data: React Query, Redux Toolkit, Zustand

Testing & Quality: Jest, React Testing Library, Lighthouse, Axe-core

Cloud & DevOps: Firebase, Vercel, GitHub Actions, CI/CD

Engineering Practices: Accessibility (WCAG 2.1), Performance Optimization, Agile, SEO

EDUCATION

Certificate in Computer Science | San Francisco, CA
